

(FOR THE BANNER.)

The Private is the glory of the General."

These are the glorious RINGGOLD, bright undying name has won, That banner will be a deathless name for each all nobly done, And other Chiefs who fall beneath the gilded banner.

Will be remembered 'till Time's sun in rayless night has set.

From the funeral pile, are reared to these the mighty dead.

Who stand upon the ensanguin'd banks of Rio Grande's bed;

And great laurels from thy tree O, liberty! they have,

To stand unwithering round the brow of every titled brave.

Then Ought we to enshrine and guard our gallant Knights who fall,

And dark oblivion ne'er o'er them shall fling its gloomy pall;

High honours are befitting noble souls, that on the field

Of war, had just, reached glory's heights, and that in glory died.

But can it be that not one gentle heart in sad-ness weeps,

The nameless hero, who beneath his well-lov'd banner sleeps?

Is there no tearful memory for him—all silent laid,

With a stone to mark his narrow bed—so lowly made!

None, are there none to sing his gallant deeds? Is it not well,

The fearless soldier like his chief in glorious battle fell,

And should he pass unnotic'd who for Freedom's name expir'd,

Must strike in such a cause the minstrel harp should ne'er have tir'd.

Yet be it so: unmindful now of ought beneath the skies,

Our young departed patriot in dreamless slumber lies.

His name no trophy tomb—nor fadeless bays—let from fall,

He calmly sleeps, though sadly far from home and native soil.

"ERROL"

THE VOLUNTEER'S FAREWELL.

We are on the far off waters now, Our glorious banner floating high; Each patriot breathes an inward vow, Those sacred folds to guard or die: Triumphantly it long shall wave! Columbia's undim'd honor glows, In every star that lights her brave, To glory or death's still repose.

But oh, my native land! too fast Thou'rt fading from our sight away; It may be that we took our last, On thy proud shore—yet must not stay— With some adventurous soul we go, To strike small life's latest swell For thee—beloved through weal and woe, Home of our hearts—farewell! farewell!" of cows may, in some measure, be determined, and from the fact that I had myself noticed the oval marks above the hind teats mentioned by M. Guenon as indicating good milking qualities, that I immediately commenced the study and application of this method to every cow that come under my observation. I have examined more than one hundred cows, and, after carefully marking their escutcheons, I have become satisfied that M. Guenon's discovery is one of great merit, and can be relied on as true. I have no doubt that I can judge very nearly as to the quantity and quality of the milk any cow will give at the height of her flow, and also the time she will continue in milk after being with calf.

The way taken to convince myself of the truth of M. Guenon's method has been to visit the cow-yards of some of our principal dairy-farmers and examine the escutcheons and marks on their cows, and make up my judgment as to the quantity and quality of milk each cow would give at the height of her flow, and how long she would continue in milk, after being with calf; then inquire of the owners how much milk their several cows would give at the height of their flow, and how long they would hold out after being with calf. Comparing the owners account with my own judgment, I find I have been mistaken in only five cases out of more than one hundred examined.

I have great confidence in M. Guenon's method of testing the milking properties of cows, and consider it one of the great discoveries of the age. The advantage of this discovery to our dairy-farmers, enabling them, as I think it does, to determine the milking properties of their young stock at an early age, must be very great and will be appreciated by every one who is in the slightest degree acquainted with the subject. In my opinion no dairy-farmer, after acquainting himself with M. Guenon's discovery, need possess himself of a bad milking cow.

M. Guenon informs us that his system is applicable to calves three or four months old. I have traced the escutcheons upon calves as early as two or three weeks old, and I see no reason why their value as future milkers may not be judged of at this age, as well as at any other age. Yours, respectfully, JOHN BROOKS.

To PRESERVE PEACH TREES.—Louis S. Gilliam, of St. Mary's county, Maryland, writes as follows to the Farmer's Cabinet:—

In the Cabinet of August 15, is a letter that was read at a late meeting of the Farmer's Club, in New York, concerning the machiel done to peach trees by insects, and the way to prevent ravages. I have now peach trees full of fruit in my garden, that were recovered by the use of quick lime around the root, after having laid them bare for some distance around the tree.

A friend informs me that he has saved a fine peacocking tree, by pouring strong tobacco juice, boiling hot, around the root and bare, and sand put around the tree instead of the earth that was given out. These trees never bore until they were treated in this way, she leaves with yellow and apparently full of insects, that finally all dropped off.

the taking of thunderbolts and bottling up lightning. Had Napoleons father been the owner of a princely estate, his son would never have been an emperor. A good kick out of doors is better for a boy than all the rich uncles in the world. One never tries to swim so hard as when he's got to do it or drown. To be a rich man's son is the greatest misfortune that can befall a young man, mentally speaking. Who fills our offices of state or honor? Not the children or the sons of the opulent. A knowledge of starch and debauchery is all a rich man's son aspires to. The parlor is the scene of their ordatory, and hair oil the care of their souls, poor creatures.

PROGRESS OF THE GOSPEL IN FRANCE.—The religious movement in France, to which the attention of Christians has again and again been directed in the country, is advancing with extraordinary rapidity. Thousands of Roman Catholics are calling with the utmost eagerness for Protestant evangelists to come and instruct them. There are large districts of the country where a faithful Protestant pastor is received by almost every individual with eagerness and delight. The influence of the priests in these departments is rapidly departing, and the stronghold of Popery are rapidly falling down before the resistless might of the word of God. The three departments in which perhaps the most remarkable religious awakenings have taken place, are those of La Charente Inferieure, L'Yonne, and Haute Vienne—and all of which are occupied by the laborers of the Evangelical Society of France.

PROBABLE ASTRONOMICAL DISCOVERY.—Towards the conclusion of a very interesting *seance* of the Royal Irish Academy, Sir Wm. Hamilton stated the probability—in his own mind, it amounted almost to a certainty, that by a certain mathematical process, which he stated, but which would be unintelligible to the general reader, he had approached if he did not actually hit, the central sun, the star round which the luminary of our own system and his satellites revolve. Should this be ascertained demonstratively, the discovery will be certainly the greatest achieved in the present century; although during the period which has elapsed, six new planets have been detected, one of them attended by moons, and the last probably also, as well as Saturn, encircled by a ring. LARGE CANNON.—"The largest cannon that ever I saw," said a traveler from Spain, "was at Gibraltar. I drove into the muzzle with a six-horse team!" "Don't believe it," said his hearers.

"It's true, I assure you," said one of them, "I was inside with a horse and buggy, at the same time, and in order to let him turn round I drove out of the touch-hole."

THE WORLD.—If we would enjoy ourselves, we must take the world as it is, mixed up with a thousand spots of sunshine—a cloud here and there—a bright sky—a storm to day, calm to-morrow—the chill, piercing winds of autumn and the bland, reviving air of summer.

THE REFORMER RONGE.—Ronge, the Catholic reformer, is at present in Hamburg, where he has preached twice to very crowded congregations. He is now assisting in the formation of a German Catholic body, and reports that there are already eighty persons are already named as members.
